**Amendments to the Specification:**

On page 1, prior to the first paragraph which begins in line 2, please insert the following:

FIELD OF THE INVENTION

On page 1, prior to the second paragraph which begins in line 16, please insert the following:

BACKGROUND OF THE INVENTION

On page 3, prior to the first paragraph which begins on line 1, please insert the following:

SUMMARY OF THE INVENTION

On page 3, line 1, amend as follows:

It is, consequently, an object of the present invention to provide a relative pressure sensor having a simple and compact construction, which delays, respectively decreases or prevents, the incursion of moisture more effectively. The object is achieved by ~~the a~~ a pressure sensor as defined in the independent claim 1 including a platform and a measuring membrane loadable with a pressure being measured, with the measuring membrane secured at its edge to the platform, with a pressure chamber being formed between the platform and the measuring membrane, with the pressure chamber communicating over a reference air path with the atmosphere, the reference air path including a winding path.

On page 6, line 10, amend as follows:

The winding path can include a line-shaped depression (20) in a surface of a component (2) of the relative pressure sensor, with the depression being covered with a suitable, additional component.

On page 10, line 13 amend as follows:

~~Further aspects of the invention follow from the dependent claims, the description of an example of an embodiment set forth below, and the sole figure of the drawing showing as follows:~~

On page 10, prior to the paragraph which begins in line 17, please insert the following:

BRIEF DESCRIPTION OF THE DRAWING

On page 10, line 17, change as follows:

The sole ~~Sole~~ figure is = an exploded drawing of a relative pressure sensor of the invention.

On page 10, prior to the last paragraph which begins on line 19, insert the following:
